

August 15, 2008

Dear Ms. Schiefer,

I fully support the move to expand the scope of practice of registered dieticians in the hospital setting to include ordering enteral and parenteral nutrition. This will undoubtedly improve patient care and improve it in a timely manner as registered dieticians are in tune with the nutritional needs of the patients on a day to day basis. It is their area of expertise after all.

Yours sincerely,

Dr. Katherine Hawken, M.D., F.R.C.P. (C), A.B.I.M.  
Internal Medicine and Gastroenterology  
St. Thomas Elgin General Hospital  
St. Thomas, Ontario, Canada
