

As a practicing pharmacist in ontario I totally support the submissions made by both the OCP and OPA. The intended outcome is "Quality Health Care". COMMUNICATION is the KEY!! In order for all Health Care Professionals to offer the most complete and best health care to the residents of ontario we all must have total access to and participation in maintaining a current accurate integrated electronic health record for each resident of ontario. Anything less would totally encumber this goal! Sue Straight BSCPhm Kenora
