

The National Association of Boards of Pharmacy (NABP) strongly supports the submission of the Ontario College of Pharmacists (The College) to amend the scope of practice statement for pharmacy. The submission and proposed amendments contained within effectively codify the existing tenets of pharmacy practice as well as the critical and necessary responsibilities of the pharmacist to manage the patient's medication therapy in collaboration with other health care providers and the patient today and into the future. NABP would be honored to provide a more detailed and formal letter of support for the submission if so desired. Thank you for your consideration. Carmen Catizone, M.S., R.Ph., D.Ph., Executive Director, NABP
