

Just a short note from a Pharmacist in the "front lines" of healthcare in Ontario! I am becoming alarmed at the increasing amount of Doctors going on holidays with no coverage for their patients. I have seen an increase at my counter of patients needing meds and not having a doctor to write for them. Here is where Pharmacist's can help immediately, We have the knowledge & the info to "fill in" til the Doctor gets back!

Just a short note, got to get back to work!
